TRA

Simple set up

Seamless Implementation

Superior service

Further makes TRAs easy for you - and your clients

Your clients can now offer an employee commuter benefit that provides savings for both employees and employers. Further's transportation reimbursement accounts (TRAs) allow employees to use pretax dollars to pay for parking and public transportation - such as train, subway, bus, ferry, trolley or vanpool - as part of their daily commute to work. Employers save money by reducing their payroll taxes.

Outstanding support for you and your clients

Your clients and employees receive 24/7 support to ensure they're getting the most out of their TRAs. Our high-touch service model provides one-on-one training sessions and a whole team of account executives and customer service representatives. This ensures seamless administration and empowers employees to take an active role in their spending decisions.

Easy, convenient, flexible

Further's TRA plan is easy to implement for employers and easy to use for employees. The plan offers a variety of options to fit employees' lifestyles, whether they commute by bus, vanpool or pay to park. Other benefits include:

Enhanced benefits package -

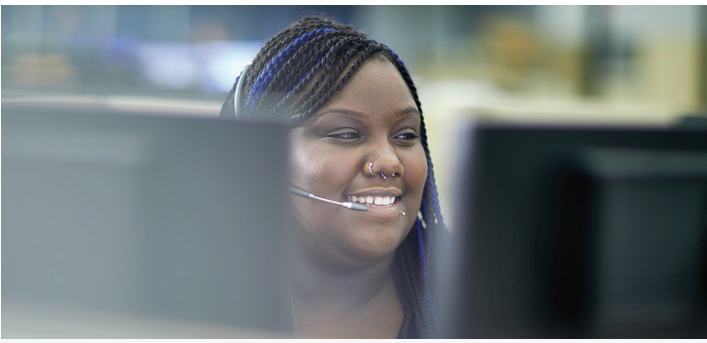

Employers are better able to attract and retain employees with a product that helps employees pay for and save on commuting costs.

Significant savings - Employees using pretax dollars reduce their commuting expenses.

Flexibility - Employees decide how much to contribute, and funds are automatically deducted from their paycheck. Unused money from the TRA rolls over from month to month.

Our customer service tops the industry

- 96 percent customer satisfaction rating year after year
- Average employment tenure of seven years
- Reduce customer service calls coming to you

The Further difference

Since 1989, Further has served as a trusted industry innovator with a deep understanding of health plan benefit design and administration. You get:

- Best-in-class customer service
- State-of-the-art reporting, marketing and branding capabilities
